the study of the environment requires the reliable and accurate measurement of extremely small quantities of chemicals and the

ability to determine if they are pollutants or naturally occurring species historically a dilute and disperse method of waste disposal has been accepted yet as we learn the long term consequences of such an approach it is clear that more rigorous waste management techniques are necessary to understand the sources and fates of contaminants and to regulate their discharge this volume presents the details of the basic analytical science involved in making these measurements it concentrates on the basic principles of sampling and sample preparation followed by the chemical principles of the major instrumental methods used in chemical analysis and detailed discussions of the major environmental matrices this book also provides coverage of topics usually only partially discussed in textbooks such as quality assurance plans and statistical data handling students majoring in environmental sciences need a foundation in measurement techniques used in the field environmental chemical analysis gives students a thorough grounding in this field and enough information to judge the quality and interpret the information produced in the analytical laboratory

welcome to the proceedings of icchp 2008 we were proud to welcome participants from more than 40 countries from all continents to icchp the international programme committee encompassing 102 experts from all over the world selected 150 full and 40 short papers out of 360 abstracts submitted to icchp our acceptance rate of about half of the submissions demonstrates the scientific quality of the programme and in particular the proceedings you have in your hands an impressive group of experts agreed to organize special thematic sessions sts for icchp 2008 the existence of these sts sessions helped to bring the meeting into sharper focus in several key areas of assistive technology in turn this deeper level of focus helped to bring together the state of the art and mainstream technical social cultural and political developments our keynote speaker jim fruchterman from benetech usa highlighted the importance of giving access to ict and at a global level in another keynote by h old thimbleby swansea university uk the role of user centred design and usability engineering in assistive technology and accessibility was addressed and finally a combination keynote and panel discussion was reserved for wai wcag2.0 which we expect to be the new reference point for accessibility from the summer of 2008 and beyond
